

Rope Maintenance Tools

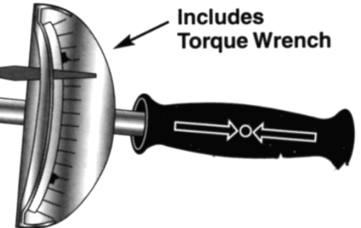

Tensionometer

IP-300 Cable Equalizer

Increase the life of the hoist ropes and sheaves, by using the quick and reliable IP-300.

- Fast
- Simple
- Accurate
- Economical

- Measures the relative tension in ropes
- Allows adjustment to equal tension
- Eliminates unequal sheave groove wear, slippage & vibration
- Lengthens service life

Dynamometer

- Used to measure Governor pull-through tension or empty car weight
- Accuracy at an affordable price (Within 2%)
- Choice of 2000 lbs. or 5000 lbs. gauge
- Solid All Metal Construction
- Made in U.S.A.

Model #	Range
LM2-0900	0 - 900 kg
LM2-2000	0 - 2000 lb
LM2-2200	0 - 2200 kg
LM2-5000	0 - 5000 lb

Roebing Clamp

The Roebing Clamp utilizes spiral ridges on one side of the groove to resist slippage. Properly applied the clamp will allow two parallel rope to share the load during shortening or tensioning applications. The clamps are designed for either 1/2" or 5/8" diameter ropes. When the included bolts are torqued to 50 ft. lbs. the clamp maintains a maximum safe working load of 600 lbs. per rope.
